Plants and
equipment
for aluminum
foundry

Melting furnaces

Melting/holding furnaces

Loaders for furnaces

Degassing plants

Coating mixers

Transport ladles

Equipment on request

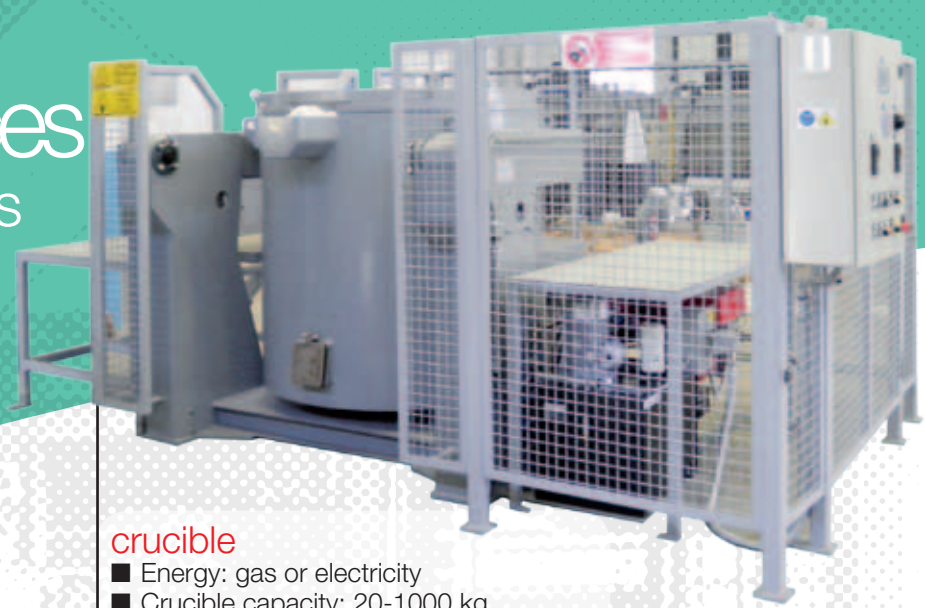

Melting furnaces for aluminium alloys

crucible

- Energy: gas or electricity
- Crucible capacity: 20-1000 kg
other sizes on request

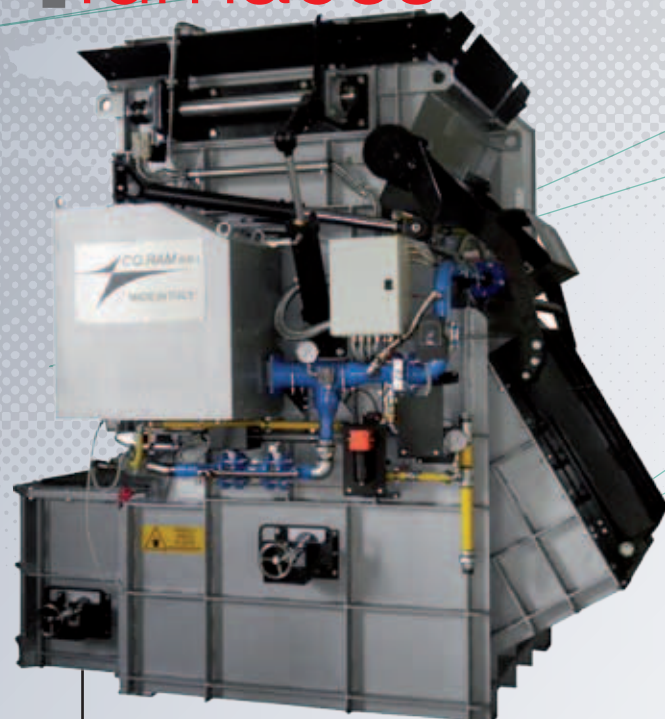

dual chamber with dry sole horizontal or vertical

- Energy: gas
- Melting capacity: 500-2000 kg/hr

Melting-holding furnaces

basin dual chamber

- Gas
- High efficiency (tower): up to 1000 kg/hr

crucible

- Electrical or gas
- Capacity: up to 1500 kg

basin single chamber

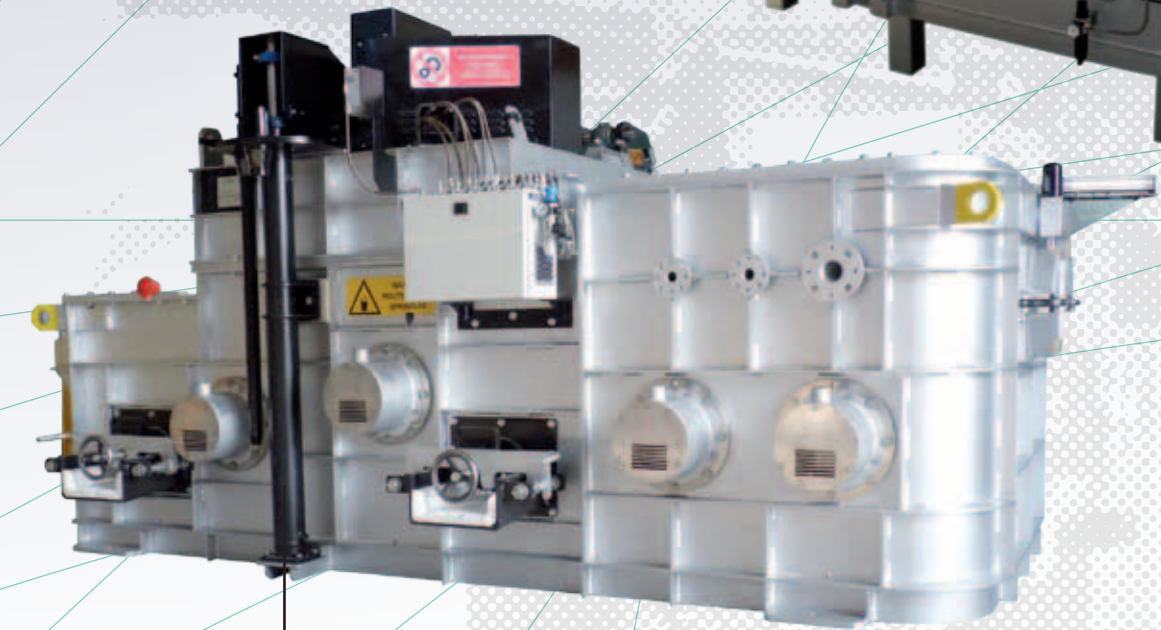

- Gas
- Melting capacity:
up to 300 kg/hr

Holding furnaces

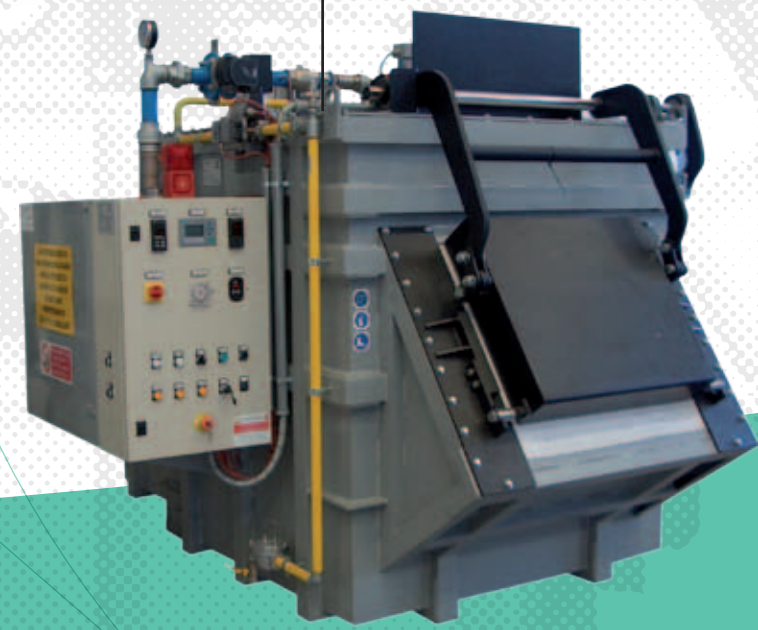

crucible

- Electrical or gas
- Capacity: up to 3000 kg

for low pressure

- Electrical heating in vault or immersed
- Capacity: up to 4000 kg

basin

- Gas
- Capacity: up to 3000 kg

basin

- Electrical with immersed heaters
- Capacity: up to 5000 kg

Plants for metallurgical treatment

degassing plants

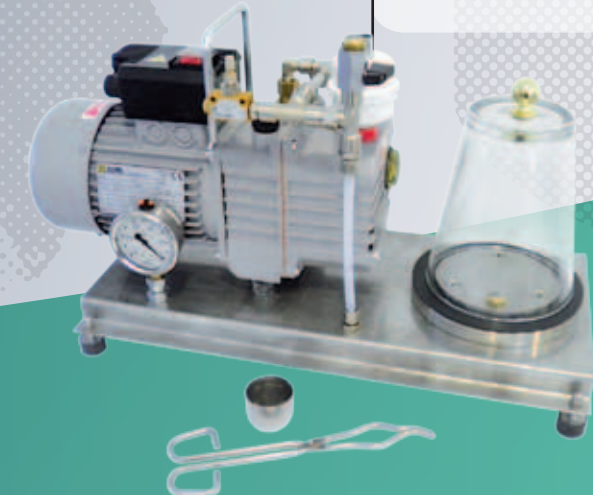

- Standard and special for all applications
(in ladle, in-line, in furnace treatments)

in-line filters

- With electrical or gas heating,
from 17 to 23 inch

Accessories for foundry

hydrogen control

- Stations for hydrogen
content control

ladles

- Standard and heated, electrical and
gas, for forklift – crane, casting on
fixed point. Automatic station for ladle
heating
